Supply, install and commission sliding
door operator

1x Record STA 21 110 slim profile operator

Custom designed door with toughened
glass by Glassync

GERARD  MCCABE

Renowned for their exquisite craftsmanship and luxury collections, Gerard McCabe Jewellers required a solution for their entrance that would ensure smooth functionality, complement their elegant brand image, and enhance security. Their aging door system was beyond repair, presenting an opportunity to upgrade with a tailored, state-of-the-art automatic door.

Record Doors developed a custom solution, installing the Record STA 21 110 slim-profile operator—a sophisticated and reliable automatic door system. This bespoke installation was designed to integrate seamlessly with the existing cavity and elevate the store's premium aesthetic.

Special features of the installation:

- **Enhanced Security with Toughened Glass:**
To address security concerns in a high-value retail environment, the installation featured toughened glass supplied by Glassync, improving both the safety of the entrance and maintaining the luxurious appearance of the storefront.
- **Custom Fit for Existing Cavity:**
The STA 21 operator was tailored specifically to Gerard McCabe's space, ensuring a precise fit that reduced installation time and preserved the store's architectural integrity.
- **Silent and Smooth Operation:**
Acoustically decoupled running tracks, nylon wheels, and a low-momentum toothed belt drive ensure whisper-quiet functionality.
- **Sleek, Premium Design:**
The slim-profile 110mm drive unit integrates effortlessly with the jeweller's entrance, delivering a modern yet timeless look.
- **Reliability and Durability:**
With features such as a failsafe electric motor brake with battery backup, height-adjustable trolleys, anti-rise wheels, and a replaceable track system, the STA 21 ensures long-term performance and safety for both customers and staff.

The installation of the Record STA 21 operator with Glassync toughened glass has provided Gerard McCabe Jewellers with a secure, reliable, and elegant entrance solution. The new system enhances the overall customer experience while reinforcing the brand's reputation for excellence.
