# Record 5950

## Max Clear Door Opening ICU

The Record 5950 was engineered for healthcare environments that demand the best. This door delivers the widest clear door opening in its class—giving patients, staff, and equipment the space they need without compromise.

Built to meet the stringent 2022 FGI guidelines adopted by more than 40 states—including California’s CBC requirements—the 5950 ensures full compliance while enhancing accessibility and efficiency.

The 5950 also features Record’s exclusive positive latching system. By integrating the latch into the header, this design eliminates the traditional hook bolt found on typical ICU doors—reducing the risk of snagging clothing or medical wires and improving safety for patients and staff.

Available in a two-panel, single slide configuration with narrow stiles, the Record 5950 delivers unmatched value, performance, and peace of mind for healthcare environments.

### Complies with the following standards and approvals.

FGI, ICC/IBC, CBC, NFPA 101

### Product features

Smooth reliable performance
Trackless
Unique positive latching system
Full open dampening for soft opening
Easy breakout
Magnetic catch easily returns door to a latched position after breakout

## Standard Features/Specs

With 44.5" clear door opening, the 5950 meets FGI and exceeds CBC code requirements.

### Options

- » Smoke seal package (UL 1784)
- » 7" and 10" bottom rails
- » 5/8", 1", 1 1/4" glass stops & blocks
