

Record DS10

Manual Sliding Doors

The Record DS10 manual sliding door system is the perfect choice for a variety of applications with its flexible configurations and dependable performance.

Manual sliders are most often used in ICU/CCU applications with the available smoke seal, but also provide an elegant, open feel to offices and conference rooms.

The DS10 is designed with equal size door panels which provide more clear door opening space. Maximizing space allows for easy transportation of patients on gurneys or wheelchairs.

Trackless single slide and three-panel telescopic configurations are available.

Product features

Smooth reliable performance

Trackless

Concealed sweeps

Full open dampening for soft opening

Easy breakout

Magnetic catch easily returns door to a latched position after breakout

Standard Features/Specs

The DS10 breaks out and returns to latched position easily.
